

April 1, 2022

To All Staff:

PLEASE READ THE ENTIRE NEWSLETTER FOR IMPORTANT INFORMATION ON COVID. THIS IS THE PRIMARY MEANS OF COMMUNICATION ON THIS TOPIC.

Changes in the information below are highlighted in green.

CDC RECOMMENDS ADDITIONAL BOOSTERS FOR CERTAIN INDIVIDUALS

Source- CDC Website: “Data continue to show the importance of vaccination and booster doses to protect individuals both from infection and severe outcomes of COVID-19. For adults and adolescents eligible for a first booster dose, these shots are safe and provide substantial benefit. During the recent Omicron surge, those who were boosted were 21-times less likely to die from COVID-19 compared to those who were unvaccinated, and 7-times less likely to be hospitalized. CDC continues to recommend that all eligible adults, adolescents, and children 5 and older be up to date on their COVID-19 vaccines, which includes getting an initial booster when eligible.

Following FDA’s regulatory action today, CDC is updating its recommendations to allow certain immunocompromised individuals and people over the age of 50 who received an initial booster dose at least 4 months ago to be eligible for another mRNA booster to increase their protection against severe disease from COVID-19. Separately and in addition, based on newly published data, adults who received a primary vaccine and booster dose of Johnson & Johnson’s Janssen COVID-19 vaccine at least 4 months ago may now receive a second booster dose using an mRNA COVID-19 vaccine.

These updated recommendations acknowledge the increased risk of severe disease in certain populations including those who are elderly or over the age of 50 with multiple underlying conditions, along with the currently available data on vaccine and booster effectiveness.

The following is attributable to Dr. Rochelle P. Walensky:

“Today, CDC expanded eligibility for an additional booster dose for certain individuals who may be at higher risk of severe outcomes from COVID-19. Boosters are safe, and people over the age of 50 can now get an additional booster 4 months after their prior dose to increase their protection further. This is especially important for those 65 and older and those 50 and older with underlying medical conditions that increase their risk for severe disease from COVID-19 as they are the most likely to benefit from receiving an additional booster dose at this time.

CDC, in collaboration with FDA and our public health partners, will continue to evaluate the need for additional booster doses for all Americans.”

Good Shepherd is reviewing options to provide on-site clinics for interested staff and residents who meet the eligibility criteria listed above. More information will follow soon.

INITIAL VACCINES\ 1st BOOSTER CLINICS

GSC still strongly urges all staff to receive the **FIRST** booster when they are eligible to protect themselves, our residents, our staff and the greater community.

Booster clinics, available to employees, will now be offered on a **monthly basis** rather than weekly. The next clinics are scheduled for:

GS Village Endwell: Monday 4/4/22 11:00am

GS Fairview Home: Monday 4/4/22 9:30am

GS Chase: Monday 4/4/22 1:30pm

The Medicine Shoppe has been extremely accommodating with providing the administration of COVID vaccines for GSC residents and staff. COVID clinics will still be available on a monthly basis, but we strongly encourage staff to sign up in advance for a clinic to avoid the Medicine Shoppe making unnecessary trips to our campuses. And if you sign up, you will be expected to report for your appointment, or to cancel with enough advance warning to allow us to notify the Medicine Shoppe.

GSFH\GSVE: Clinics are held monthly on Mondays. Staff will be required to sign-up for the vaccine by Friday in order for GSC to notify the Pharmacist he needs to come that following Monday. Please instruct staff to sign-up on the sheet located on the bulletin board outside of the HR Wellness RN's office. Managers may also email the HR Wellness RN the employees name and type of vaccination they wish to receive. If the Pharmacist is on site and an employee wishes to receive a vaccination without prior notification walk-ins will still be allowed.

Chase: Clinics are held monthly on Monday. Staff will be required to sign-up for the vaccine by Friday in order for GSC to notify the Pharmacist he needs to come that following Monday. Please instruct staff to sign-up on the sheet located by the executive secretary's desk. . Managers may also email the executive secretary, Jenn Carkuff, the employees name and type of vaccination they wish to receive. If the Pharmacist is on site and an employee wishes to receive a vaccination without prior notification walk-ins will still be allowed.

Vaccinations are also available at many local pharmacies; CVS, Walgreens, etc., by appointment. **And The Medicine Shoppe offers vaccines on most Fridays at its retail location at 1179 Vestal Ave Suite 1, Binghamton, NY 13903.** If you are interested in this option, please contact your HR Wellness RN to coordinate your visit.

Once you have received your booster, please provide your HR RN Wellness Nurse (DON @ Chase) with your updated COVID vaccination ID card.

Any questions please contact the HR RN Wellness Nurse, DON at Chase, Human Resources or your Supervisor.

TRANSMISSION RATES FOR BROOME AND CHENANGO COUNTIES

CMS ISSUED GUIDANCE ON EMPLOYEE TESTING: STAFF NOT FULLY UP TO DATE INCLUDING UN-BOOSTED STAFF SUBJECT TO ROUTINE TESTING

In general, the testing guidance replaces the term “vaccinated” with “up-to-date with all recommended COVID-19 vaccine doses” and deletes the term “unvaccinated.” In addition, it updates the recommendations for testing individuals within 90 days after recovering from COVID-19. “Up-to-Date” means a person has received all recommended COVID-19 vaccines, including any booster dose(s) when eligible.

As a result of this updated guidance, staff who are fully vaccinated and eligible for a booster, *but are not boosted*, must be tested routinely based on the [community transmission rates in your facility’s county](#), along with those who are not fully vaccinated and those who are unvaccinated (i.e., exempt). In most counties, this is still twice weekly. Staff who are fully vaccinated and boosted and staff who have recovered in the prior 90 days do not need to be routinely tested for COVID-19. In general, the guidance provides that “testing is not necessary for asymptomatic people who have recovered from SARS-CoV-2 infection in the prior 90 days; however, if testing is performed on these people, an antigen test instead of a nucleic acid amplification test (NAAT) is recommended. This is because some people may remain NAAT positive but not be infectious during this period.”

Table 2: Routine Testing Intervals by County COVID-19 Level of Community Transmission

| Level of COVID-19 Community Transmission | Minimum Testing Frequency of Staff <i>who are not up-to-date</i> ⁺ |
|--|---|
| Low (blue) | Not recommended |
| Moderate (yellow) | Once a week* |
| Substantial (orange) | Twice a week* |
| High (red) | Twice a week* |

⁺Staff *who are up-to-date* do not need to be routinely tested.

*This frequency presumes availability of Point of Care testing on-site at the nursing home or where off-site testing turnaround time is <48 hours.

Good Shepherd will be following this guidance, and will be testing employees are not up to date including those who have not received the booster with frequency based on the new guidance.

Broome County shows a **high level of transmission, necessitating **twice a week** testing for staff not up to date with all eligible COVID vaccines.**

Chenango County show a **substantial level of transmission, necessitating **twice a week** testing for staff not up to date with all eligible COVID vaccines.**

NYS Mask Mandate

The Governor has lifted the mask mandate for businesses, but noted Counties, Cities and businesses can choose to continue to require masks. The mask requirement remains in effect for the following:

- **State regulated Health Care Settings**
- **State regulated Adult Care Facilities and Nursing Homes**
- Correctional Facilities
- Schools and Child Care Centers
- Homeless Shelters
- Domestic Violence Shelters
- Buses and bus stations, trains and train stations, subways and subway stations, and planes and airports

Given the Broome County statistics reported above, we are still concerned that the Community Transmission Level is at High, and given our vulnerable population, we will continue to require masks for both staff and residents in Independent Living when in public areas other than when seated for drinks or a meal. We will re-evaluate this policy on a regular basis.
