March 11, 2022

To All Families and Residents

PLEASE READ THE ENTIRE NEWSLETTER FOR IMPORTANT INFORMATION ON COVID. THIS IS THE PRIMARY MEANS OF COMMUNICATION ON THIS TOPIC.

“WELCOME” TO OUR NEW FAMILY CONTACTS

We are required to notify all residents, families and staff of a facility whenever we have a positive COVID test result for any staff member or resident. Two points of contact are required.

To help us meet these requirements, we have utilized a broadcast tool (School Messenger) to send emails and automated phone calls to up to two email addresses and two phone numbers per resident or resident contact, which is usually the first Health Care Proxy. The system then broadcasts to all the contact phone numbers and emails in this database. We also use this system to send out this update letter to our resident family contacts.

You will also receive a broadcast when we have a staff member or resident test positive for COVID-19. This includes an email *and a phone call*. We understand these phone calls can come at inconvenient times and would like to offer you the option to opt out of the phone calls for one or both of the numbers on file *so long as we have an email address on file to receive the alert*. This opt out will only effect the notification databases used by School Messenger. All contact info will remain on file in our Electronic Health Record, PointClickCare.

If you wish to opt out of alerts for one or both phone numbers we have file, please email me at pm@goodshepherdcommunities.org with the specifics. Please note it will take time to make the changes to the databases, so dependent on volume, there may be a delay from the time you make the request and the time the database revisions are completed. Thank you in advance for your patience.

Changes to the information provided below are highlighted in green.

COMMUNITY LEVELS FOR BROOME AND CHENANGO COUNTIES

COVID-19 County Check

Find community levels and prevention steps by county.

Select a Location (all fields required)

New York Broome County

[< Start Over](#)

● Medium

In Broome County, New York, community level is **Medium**.

- If you are [at high risk for severe illness](#), talk to your healthcare provider about whether you need to wear a mask and take other precautions
- Stay [up to date](#) with COVID-19 vaccines
- [Get tested](#) if you have symptoms

COVID-19 County Check

Find community levels and prevention steps by county.

Select a Location (all fields required)

New York Chenango County

[< Start Over](#)

● Low

In Chenango County, New York, community level is **Low**.

- Stay [up to date](#) with COVID-19 vaccines
- [Get tested](#) if you have symptoms

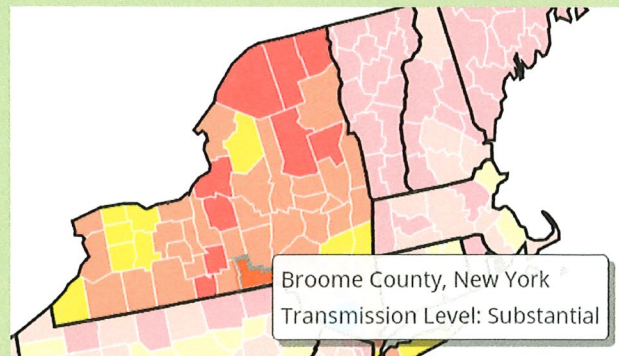

7 DAY METRICS FOR BROOME AND CHENANGO COUNTIES

Broome County, New York

[State Health Department](#)

7-day Metrics | [7-day Percent Change](#)

| | |
|---|-------|
| Cases | 176 |
| Case Rate per 100k | 92.39 |
| % Positivity | 3.66% |
| Deaths | <10 |
| % of population ≥ 5 years of age fully vaccinated | 66.7% |
| New admissions of confirmed COVID-19 among county residents (estimated) | 33 |

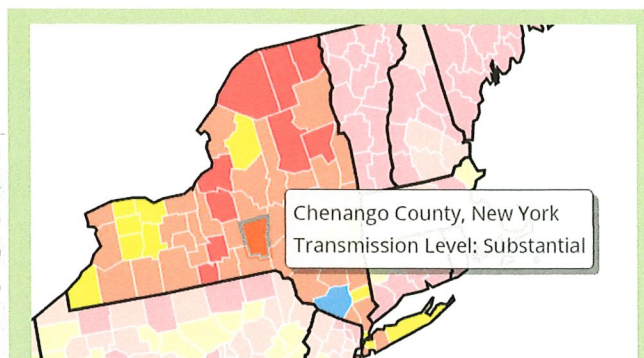

Chenango County, New York

[State Health Department](#)

7-day Metrics | [7-day Percent Change](#)

| | |
|---|-------|
| Cases | 35 |
| Case Rate per 100k | 74.14 |
| % Positivity | 4.22% |
| Deaths | <10 |
| % of population ≥ 5 years of age fully vaccinated | 64.1% |
| New admissions of confirmed COVID-19 among county residents (estimated) | 1 |

NYS Mask Mandate

The Governor lifted the mask mandate for businesses, but noted Counties, Cities and businesses can choose to continue to require masks. The mask requirement remains in effect for the following:

- State regulated Health Care Settings
- State regulated Adult Care Facilities and Nursing Homes
- Correctional Facilities
- Schools and Child Care Centers
- Homeless Shelters
- Domestic Violence Shelters
- Buses and bus stations, trains and train stations, subways and subway stations, and planes and airports

Given the Broome County statistics reported above, we are still concerned that the Community Transmission Level is at Substantial and the Community Level is at Medium, and given our vulnerable population, we will continue to require masks for both staff and residents in Independent Living when in public areas other than when seated for drinks or a meal. We will re-evaluate this policy on a regular basis.

NYS COVID GUIDANCE for SNF VISITORS

- **SNF Visitors Masking and Distancing:**
 - All visitors must wear a well-fitting non-surgical paper mask or a mask of higher quality (i.e., surgical mask, KN95, or N95) at all times during any visitation at the facility. If the visitor wishes, a cloth mask may be placed over the paper mask. The masks must cover both the nose and the mouth.
 - All visitors must physically distance from facility personnel and other patients/residents/visitors who are not directly associated with the specific resident(s) being visited by that individual.
- **SNF Visitor Testing**
 - All nursing homes “must verify that visitors have received a negative SARS-CoV-2 test result one day prior to visitation for antigen tests and two days prior to visitation for NAAT (e.g., PCR) tests.” This means, for example, that a test for a Sunday visit should be conducted no earlier than Saturday if it’s an antigen test or Friday if it’s a PCR test. We can accept lab results or the results of a home test.
 - Results should be presented at screening.
 - GS will provide rapid tests for those *unable to obtain them elsewhere*. These tests can be obtained from the receptionist screening the visitor, but must be administered outside of the facility independent of any assistance from our staff. Unfortunately, our staff will not

be able to provide direction or physical assistance with the testing, so visitors who are unsure of their ability to self-administer the test should make alternate arrangements. For visitors who visit for multiple days, including a visitor who comes every day, proof of negative testing is required as often as feasible, at a minimum every third day (meaning at a minimum testing is required on day 1, day 4, day 7, and so on).

- Please note that GS has a limited supply of these tests. We encourage all visitors to explore alternative sources for testing:
 - Every home in the U.S. is eligible to order 4 free at-home COVID-19 tests. The tests are completely free. Orders will usually ship in 7-12 days. The following link will allow you to order your free tests: <https://special.usps.com/testkits>
 - Pharmacies and other retail outlets.
 - Community based testing sites. To find one in your area, use the following link <https://www.hhs.gov/coronavirus/community-based-testing-sites/index.html>
- Exemptions:
 - Ombudsman representatives. Under certain circumstances, the resident and ombudsman should be made aware of the potential risk of visiting, and the visit should take place in the resident's room.
 - Compassionate care visitors who are visiting in anticipation of end of life or in the case of significant mental, physical, or social decline or crisis. Other compassionate care visits are not exempted- only those that are so urgent in nature that the requirement to provide test results would result in an unacceptable delay in visiting. The visitor must wear any additional PPE that the facility deems appropriate.
 - Emergency Medical Services personnel.
- **Protocol for SNF visitor testing:**
 - When visitors enter the building for screening they will be asked for their negative test results. Negative test results could be: a test card (Antigen Rapid test), electronic results (shown from their phone or tablet), or a paper laboratory result (PCR.)
 - Receptionist/designee will confirm negative results on the visitor sign in log
 - If the visitor does not present negative test results they will be given an iHealth OTC COVID-19 Antigen Rapid Test.
 - The visitor should then return to their car and complete the test.
 - All tests cards should be discarded in a red biohazard bag located in the lobby.
 - In the event a visitor refuses testing they will not be permitted in the facility. The receptionist should contact the HC Nurse immediately. The visitor may provide their contact information and the Nursing Home Administrator will contact them on the next business day.
 - Note: If a visitor enters the facility after normal reception hours, the House Charge Nurse will be responsible to confirm negative test results and document on the visitor sign in log.
- Positive Results and Infection within Prior 90 Days:
 - Visitors who have a positive viral test for COVID-19, symptoms of COVID-19, or currently meet the criteria for quarantine should not enter the facility *until they meet the criteria used for residents to discontinue transmission-based precautions (quarantine)*, generally 10 days (revised to reflect new CMS guidance below)

- If a visitor has had COVID-19 in the past 90 days, they must still be tested. If they test positive, they must be excluded.

CMS ISSUES NEW GUIDANCE ON VISITATION

CMS issued new guidance on visitation just yesterday, and we anticipate Leading Age NY will provide an analysis of how this new guidance may impact NYS's regulations regarding visitation soon. The new CMS guidance includes the following:

The visitation guidance replaces the term "vaccinated" with "up-to-date with all recommended COVID-19 vaccine doses" and deletes the term "unvaccinated." In addition, it updates visitor screening and quarantine criteria. Specifically, the updated guidance:

- Clarifies that visitors who have a positive viral test for COVID-19, symptoms of COVID-19, or currently meet the criteria for quarantine should not enter the facility *until they meet the criteria used for residents to discontinue transmission-based precautions (quarantine)*, generally 10 days.
- Provides that if a resident's roommate is *not up-to-date* with all recommended COVID-19 vaccine doses, or immunocompromised (regardless of vaccination status), visits should not be conducted in the resident's room, if possible.
- Reinforces the need for masks and physical distancing during indoor visits when around other residents or HCP regardless of vaccination status, and:
 - If the nursing home's county COVID-19 community level of transmission is **substantial to high**, all residents and visitors, regardless of vaccination status, should wear face coverings or masks and physically distance, at all times.
 - In areas of low to moderate transmission, the safest practice is for residents and visitors to wear face coverings or masks and physically distance, particularly if either of them is at increased risk for severe disease or is *not up-to-date with all recommended COVID-19 vaccine doses*.
 - Residents, regardless of vaccination status, can choose *not to wear face coverings or masks when other residents are not present and have close contact (including touch) with their visitor*.
 - Residents (or their representative) and their visitors *who are not up-to-date with all recommended COVID-19 vaccine doses* should be advised of the risks of physical contact prior to the visit.
- Modifies provisions related to residents who leave the nursing home and return to recommend quarantine and testing for those who are not up-to-date with vaccinations.

BOOSTER MANDATE FOR HEALTH CARE EMPLOYEES

NYS announced it will not enforce the booster mandate that went into effect 2/21/22 and that they will re-assess this in three months. However, GSC still strongly urges all staff to receive the booster when they are eligible to protect themselves, our residents, our staff and the greater community.
